pH Capsule Monitoring System

GASTROENTEROLOGY

Wireless pH Capsule Reflux
Monitoring System

alpHaONE

Establish a clear path in GERD diagnosis

With an increasing number of options for GERD diagnosis, patients and healthcare providers face a challenge in choosing the best solution for a clear diagnosis. alpHaONE is a calibration-free wireless reflux testing system that offers monitoring for up to 96 hours giving healthcare providers the information they need to make accurate diagnoses and effective treatment plans.

RECORDER

Ergonomic and compact design

Patient-friendly design with enlarged, easy-to-press buttons

Battery operated allowing for immediate patient use

CAPSULE

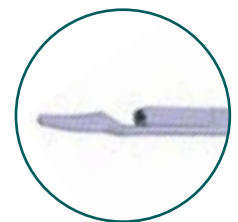

Calibration-free and up to 96 hours comprehensive recording

Easy handling and fail-safe mechanism for capsule attachment (or delivery)

Smooth conveyer tip to avoid injury during placement

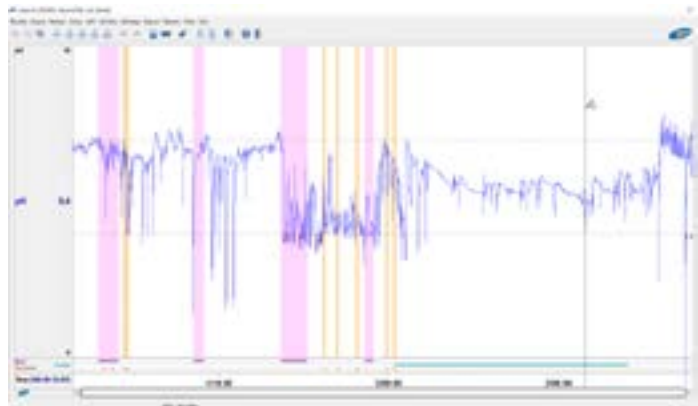

All-in-one software platform

The new software platform is your one-stop destination for reflux studies. You can prepare, download and review cases from pH-capsules as well as cases from pH and pH-impedance catheters.

- Virtual Instruction Program (VIP) for intuitive navigation
- User-definable buttons
- Comprehensive user-definable reports
- Multiple investigation protocols

EDITING

- Automatic analysis of the pH data
- Comprehensive tools for zooming and navigation of the study
- Quick results for detailed pH and symptom score

REPORT

- Customize and export reports
- Perform various calculations including SI, SSI and SAP
- Generates pH data analysis table, process DeMeester rating automatically
