

Available in two sizes to fit all types of endoscope.

Protects the endoscope during transportation and storage to reduce the risk of damage and increase equipment availability.

Minimal contact with the endoscope, allowing aeration and facilitating easy removal.

Unique clean/dirty tab helps to prevent reuse with subsequent endoscopes.

With sterile packaging and only suitable for single use to reduce cross contamination.

PROTECH

Flexible Endoscope Tip Protector

A simple, safe and highly effective method of protecting the delicate optics in the distal end of the endoscope.
