

NEUTRA-FLUSH™

Endoscope Channel Cleanser

Just open it!

THE COMPLETE CIRCLE OF PROTECTION

As the global vanguard in infection prevention, **only Cantel delivers the Complete Circle of Protection**, a full-value, proactive partnership dedicated to helping you remove risk, streamline operational efficiencies and optimise your success.

MANUAL CLEAN Manual cleaning is essential in removing bioburden and preparing the endoscope for high-level disinfection. For optimal results, Cantel’s manual cleaning products and detergents are designed to be a critical first step to efficiently and effectively eliminating bacteria on endoscopes prior to reprocessing.

NEUTRA-FLUSH™ Cleaner is a convenient, space saving, pre-cleaning kit containing a neutral, low foaming detergent cleanser to comply with the latest recommendations. Designed for the initial flush and wipe of an endoscope at the bedside, NEUTRA-FLUSH™ Cleaner is user friendly and easy to use. . . just open it!

“The insertion tube and critical components (e. g. the distalend of duodenoscopes and echoendoscopes) should be wiped externally with cleaning solution, using a soft, disposable cloth/sponge, and checked for any macroscopic damage.”

Reprocessing in GI endoscopy: ESGE–ESGENA Position Statement – Update 2018 - P.10 & P.11

“Before the endoscope is detached from the light source and video processor, detergent solution should be sucked through the instrument/suction channel.”

Reprocessing in GI endoscopy: ESGE–ESGENA Position Statement – Update 2018 - P.10 & P.11

“Endoscope channels should be flushed immediately following the procedure and the external surfaces socially cleaned.”

National Endoscopy Programme - Decontamination Standards for Flexible Endoscopes, March 2008

Ordering information for Germany, BeNeLux, Italy
