CANTEL IS INTRODUCING DEHP-FREE PRODUCTS TO IMPROVE HUMAN AND ENVIRONMENTAL SAFETY!

At Cantel we are aware of our responsibility to take care of people as well as the environment. DEHP is a synthetic chemical used to make plastics more flexible. During the last several years we've worked on developing our products without the use of DEHP. By choosing products that are not made with PVC and DEHP, we can help eliminate potential toxins and other safety hazards that could affect your staff, patients and the environment. Customers can expect the same performance, reliability and functionality of these products without any visual changes. **We are proud to announce that our DEHP-free products* are now launching!**
