Why join us

Secure your place to see state-of-the-art medical technology in action at Blue Colonoscopy A complimentary virtual event for GI endoscopists, colonoscopists, nurses and endoscopy staff!

This comprehensive **online event** would focus on ways to improve the diagnosis of cancerous and precancerous lesions highlighted during the colonoscopy.

Join our specialists as they demonstrate the product in use through live procedures, and discover how **unique technologies** and new approaches will support medical practitioners to improve colonoscopy activities and the treatment of colonic diseases.

Blue Colonoscopy aims to highlight the potential of **dedicated technology** and emphasize how technology and education are integral to the advancement of the medical industry. This course is intended for all GI endoscopists, colonoscopists, nurses, and endoscopy staff, and is essential viewing **for anyone interested in medical technology**, or who wants to become acquainted with the product before its widespread implementation.

Whether you are at university, hospital, work, home, or in an office - join us as we explore in detail **exciting advancements in the field** of colonoscopy. Register your interest today!
