## 2024

Palermo | March, 14-16 2024

**Course director**

Roberto Di Mitri

**Course co-director**

Alessandro Repici

**PROGRAMME**

The continuing technical innovation and the development of new highly performing devices and instruments have led to a progressive and steady growth of Digestive Endoscopy.

Endoscopy procedures have nowadays a central and crucial role in the management of digestive diseases in all medical settings. Novel and advanced technologies along with the development of artificial intelligence systems contribute to further expanding Digestive Endoscopy both in diagnosis and treatment of a vast majority of digestive disease conditions.

The **ENDOMED 2024** project was designed and implemented to offer a comprehensive update on different topics of clinical impact and emerging relevance in the field of clinical gastroenterology and digestive endoscopy.

Aim of **ENDOMED 2024** is to promote and disseminate advances in clinical and technological innovation in digestive endoscopy with the final goal of facilitating growth of a common cultural and technical background of the different clinical gastroenterology organizations operating in the Mediterranean area.
