BALLOON DILATOR

Worlds first 5-stage gastrointestinal dilation balloon

Unique 5 mm & 21 mm diameter balloons

Decreases need for multiple balloons

Rapid and complete deflation

Optimal balloon clarity

Accurate, reliable balloon sizing

Gastric Fundoplication

EsophyX[®] Z+ Device

HELICAL RETRACTOR

Engages and retracts tissue

Anchors gastroesophageal junction during fundoplication

Stows/locks safely inside tissue mold during insertion and removal

TISSUE MOLD AND CHASSIS

Plicates and compresses tissue

Rotates fundus around esophagus to create partial wrap

INVAGINATOR

Suctions esophageal tissue circumferentially

Reduces small hiatal hernia

Facilitates proper position of fundoplication caudal to diaphragm

REBUILD THE OPTIMAL ANTI-REFLUX BARRIER

STYLETS AND SEROSAFUSE® FASTENERS

Provides durable tissue apposition

Fasteners maintain tissue compression throughout healing process

Increased compatibility with a wide range of high definition endoscopes (8.6 to 11.4mm diameter)

Simultaneous dual fastener deployment using new trigger handle design

Tissue mold designed to shroud stylets during fastener delivery

Compatible with 7.5 mm SerosaFuse® Implantable Fastener cartridges

SEROSAFUSE® FASTENERS

Non-resorbable, polypropylene (equivalent web strength to 3-0 suture)

H-shaped fastener; designed to help avoid entrapment of blood vessels or nerves

Low profile minimizes foreign body presence and enables mucosa to remodel over defect, protecting muscularis from digestive milieu*

*The findings presented are based on research conducted in animal models.
