RESILIENCE™

Through-the-Scope Esophageal Stent

A proprietary anti-migration design[1] paired with a single-handed deployment system, Resilience supports efficient and accurate stent placement.[1]

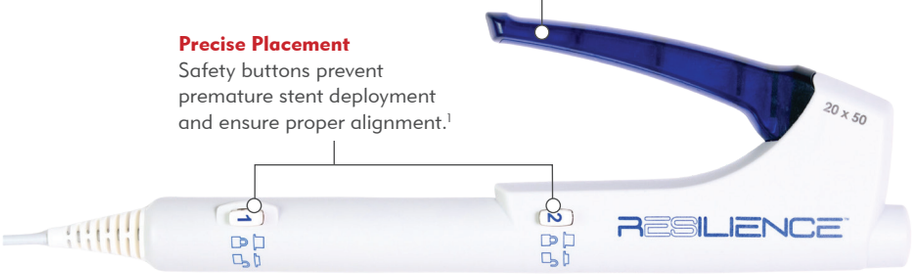

Greatest Migration Resistance[1]
The double-flange stent configuration is designed to demonstrate the greatest migration resistance among currently available through-the-scope stents.[1]

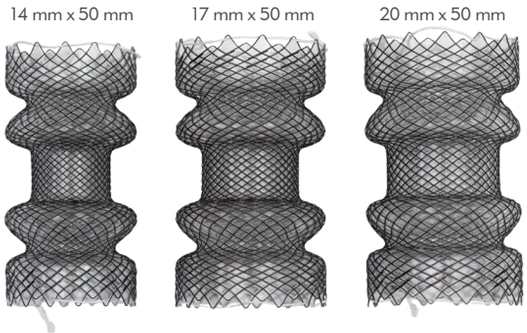

Luminal Patency[1]
Stent midbody compression and expansion force help to keep strictures open while mitigating migration.[1,2]

Controlled Deployment
Ratchet deployment system offers auditory and tactile feedback,[1] placing the physician in control.

Precise Placement
Safety buttons prevent premature stent deployment and ensure proper alignment.[1]

Unique Size Options[1]
Only esophageal stent on the market offering sizes for short strictures.[1]
