MERIT MEDICAL®

RESILIENCE™

Through-the-Scope Esophageal Stent

True to its form, Resilience holds its ground.

RESILIENCE™

Through-the-Scope Esophageal Stent

ESOPHAGEAL CANCER: A GLOBAL HEALTHCARE BURDEN

Esophageal cancer remains a significant global challenge.

One of the top ten causes of cancer deaths worldwide[1]

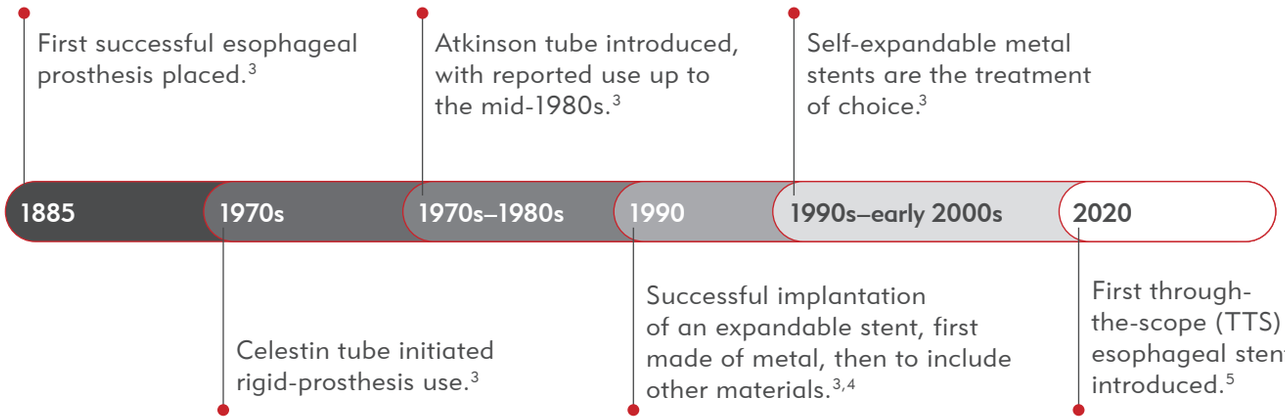

Risk increases with age[2]

GERD and Barrett's esophagus increase cancer risk[2]

ESOPHAGEAL STENTS: A HISTORY

As esophageal cancer progresses, malignant strictures narrow the lumen, making it difficult to swallow, severely impacting nutrition and quality of life. Esophageal stents have long been used to treat esophageal strictures, helping patients eat and drink comfortably while receiving ongoing cancer care.

THE NEED FOR BETTER STENT TECHNOLOGY

Despite ongoing product evolution, a need for better technology remains, with many current stents prone to migration and other complications.

migration after placement[6]

TRUE TO IS FORM, RESILIENCE HOLDS ITS GROUND.

A proprietary[7] design results in less stent migration, so physicians can be confident in patient care.

Greatest Migration Resistance[7]
The double-flange stent configuration is designed to demonstrate the greatest migration resistance among currently available through-the-scope stents.[7]

Fully Covered
Biocompatible-silicone covering minimizes tissue ingrowth, and suture loops enable repositioning and removal.[7]

Luminal Patency[7]
Stent midbody compression and expansion force help to keep strictures open while mitigating migration.[7,8]

UNIQUE SIZES

Resilience meets a variety of clinical needs and is the only esophageal stent on the market offered in sizes for short strictures.[7]

14 mm x 50 mm

17 mm x 50 mm

20 mm x 50 mm

RESILIENCE™

Through-the-Scope Esophageal Stent

PLACING PHYSICIANS IN CONTROL

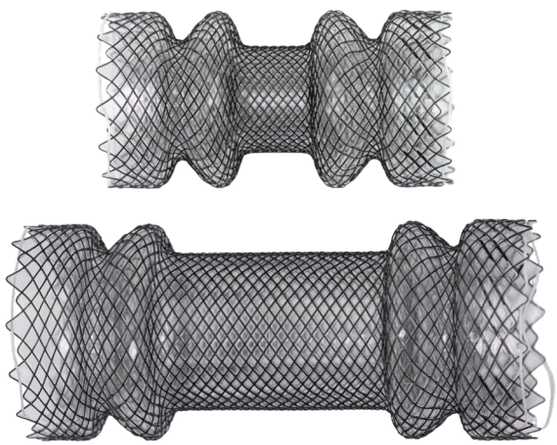

Paired with a user-friendly, single-handed, ratchet deployment system, physicians can control deployment with or without a second operator, ensuring efficient and accurate stent placement.[7]

Precise Placement
Safety buttons prevent premature stent deployment and ensure proper alignment.[7]

Controlled Deployment
Ratchet deployment system offers auditory and tactile feedback,[7] placing the physician in control.

ORDERING INFORMATION

Catalog Number	Stent Midbody Diameter	Total Length	Midbody Length	Flare Diameter
RE145	14 mm	50 mm	10 mm	24 mm
RE146	14 mm	60 mm	20 mm	24 mm
RE147	14 mm	70 mm	30 mm	24 mm
RE175	17 mm	50 mm	10 mm	27 mm
RE176	17 mm	60 mm	20 mm	27 mm
RE177	17 mm	70 mm	30 mm	27 mm
RE205	20 mm	50 mm	10 mm	28 mm
RE206	20 mm	60 mm	20 mm	28 mm
RE207	20 mm	70 mm	30 mm	28 mm
