4th Edition

Welcome to EUS Skyline: from diagnostic to therapeutic

ALBERTO LARGHI | ITALY

SCHALK VAN DER MERWE | BELGIUM

Welcome to the 4th Edition of EUS Skyline—an unmissable event for all endoscopy professionals!

Returning on **December 5, 2025**, this year's program builds upon our strong heritage in EUS by expanding its scope to encompass a broader range of advanced hepatobiliopancreatic (HBP) procedures.

In recent years, HBP endoscopy has grown into a distinct subspecialty, demanding expertise in both EUS and ERCP to effectively diagnose and treat patients. That's why **we are thrilled to offer an enriched agenda** featuring not only diagnostic and interventional EUS, but also ERCP, cholangioscopy, pancreatoscopy, and other complex techniques.

Backed by a world-class faculty of pioneering experts, EUS Skyline 2025 promises to deliver cutting-edge scientific content, live demonstrations, and in-depth discussions on the rapidly evolving field of HBP endoscopy. From best practices in EUS-guided procedures

to the latest technological advancements in ERCP, our aim is to provide a comprehensive educational experience that meets the needs of a diverse global audience.

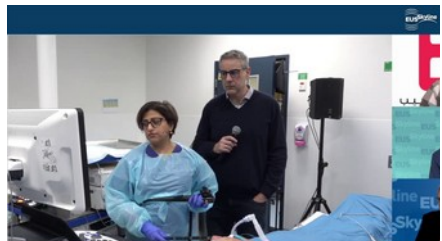

Save the date, join us, and improve your expertise in the future of endoscopic care. We look forward to welcoming you to this unique forum, which you can follow from anywhere in the world in a truly global marathon. Over the years, EUS Skyline has brought together professionals from 127 countries, fostering a vibrant community built on knowledge-sharing, innovation, and collaboration—driving the evolution of modern HBP endoscopy.
