MAGENTIQ-COLO™

in action

✓ AI improves the level of detection with bounding boxes on almost every polyp

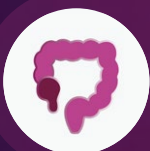

✓ New FDA-Cleared Tool Detection
MAGENTIQ COLO intelligently identifies when endoscopic tools enter the field and removes the bounding box to ensure a clear, unobstructed view of the polyp.

✓ Currently Available in Europe - Polyp Type and Size Estimation
Two real-time visual gauges for both polyp type and size. Each detected polyp is automatically documented with a snapshot, classification, size, and detection time for inclusion in the final report.
